Dry Eye Stories

“My eyes were an increasing problem for me. My whole quality of life was definitely impacted. Now there are days that go by I don’t need my eye drops. It’s a matter of reclaiming hours of my life.”

– Noelle

“Now I’m back to being active. I can run, I can bike ride. I have an 8 year old and can do all the things that I want to do with him. I couldn’t do a lot of that before. It’s changed my life. It really has.”

– Brigitte

“The realization that I was benefitting from the procedure came in the fact that I wasn’t thinking about my eyes.”

– Robert

² Data on File.

Think you may have dry eye?

Take the quiz below to find out.

1

Do you experience **sensitivity to light**, **blurred vision**, a **burning sensation**, or **discomfort** in windy or dry conditions?

☐ Yes ☐ No

2

Have you **decreased your participation** in or **experienced discomfort** during any of the following activities?
(Check all that apply.)

- ☐ Outdoor activities
- ☐ Reading
- ☐ Watching TV
- ☐ Using the computer

3

Do you **use drops** for dry or irritated eyes?

☐ Yes ☐ No

If you answered yes to any of the questions above, ask your doctor about LipiFlow®.

Not Enough Tears?

The most common form of Dry Eye is **Evaporative Dry Eye**, which affects **9 out of 10 Dry Eye cases (86%)¹**. This form results from a shortage of oil on the surface of your tears caused by a blockage in your eyelid (Meibomian) glands, leading tears to evaporate faster than normal.

Your Evaluation

Your doctor will perform a series of evaluations to determine the likely cause of your Dry Eye. This can include a **LipiView tear film assessment** and a **Meibomian gland evaluation**. Knowing what is causing your Dry Eye will help your doctor determine the best treatment option.

¹Lemp MA, et al. Distribution of aqueous deficient and evaporative dry eye in a clinic-based patient population. Cornea. 2012 May;31(5):472-8.

Imagine returning to doing the things you enjoy, without thinking about your eyes.

***LipiFlow®** could be your first step to relief.*

Relief with LipiFlow®

LipiFlow® is a procedure **designed to treat the root cause of Evaporative Dry Eye, blocked Meibomian glands**.

LipiFlow® works by applying directed energy to the eyelid near the affected glands—precisely targeted warmth from the back of the eyelid, and slight pressure from the front. This treatment is performed right in your doctor's office.
