SPYGLASS
PHARMA™

**TIGRIS CLINICAL
STUDY**

Approved by Sterling IRB, IRB ID: 11189

HOW IT WORKS

The SpyGlass Drug Delivery Platform consists of bimatoprost drug pads attached to the SpyGlass Intraocular lens. The system is then implanted using the same technique as for standard cataract surgeries. Upon implant, the drug pads release bimatoprost to lower eye pressure.

Please inform your health care provider if you are in need of cataract surgery (have a cloudy lens inside of your eye) and have glaucoma or ocular hypertension.

PARTICIPATION INCLUDES:

- Compensation for time and travel required
- Eye examinations and follow up care for up to 3 years
- Compensation for study-related medications

The SpyGlass Drug Delivery Platform is limited by Federal (or United States) law to investigational use.
